

I'M CONFUSED.

Why are Democrats pushing to pass HR1 if they are worried about voter suppression?

- If **no ID is required**, what prevents someone from voting multiple times in multiple precincts? For every duplicate vote cast, **isn't a legal vote is suppressed?**
- If **no ID is required**, then anyone could vote regardless of whether they are a citizen. Doesn't that **suppress the vote of legal citizens?**
- If **mail-in ballots** are mailed to everyone (whether they want one or not), doesn't that **open the door to fraud?** Doesn't every fraudulent vote **suppress a legal vote?**
- Doesn't the Federal government seizing the **election authority from states** suppress the **rights of the states?**
- Doesn't **automatic registration** suppress **my right** to decide whether I want to be registered? Doesn't it also **register non-citizens?** Doesn't a non-citizen vote **suppress legal votes?**
- Doesn't **harvesting** open the door to **fraud - suppressing legal votes?**
- If election officials are prevented from **verifying voter rolls** and removing ineligible and/or dead voters, **ghost votes** could be fraudulently cast. Wouldn't that **suppress legal votes?**
- If **censorship** of political campaigns, activity, speech is expanded - then isn't **free speech suppressed?**
- If **access to federal courts** is limited for anyone challenging HR 1, aren't the **people's rights suppressed?**
- **Nationwide same-day registration** doesn't allow the proper time to verify a person is who they say they are. If the registration is **fraudulent** and a vote is cast, doesn't that **suppress legal votes?**

HR1 is the very definition of voter suppression.
